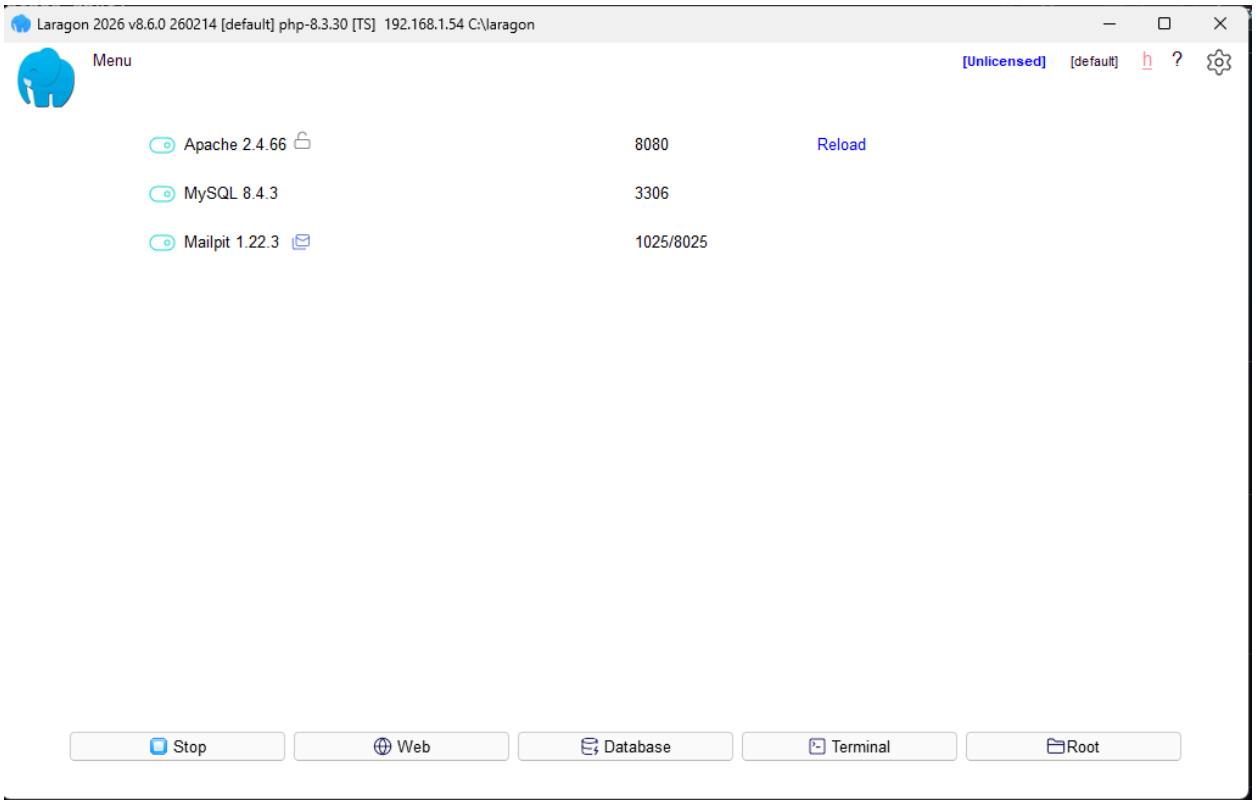
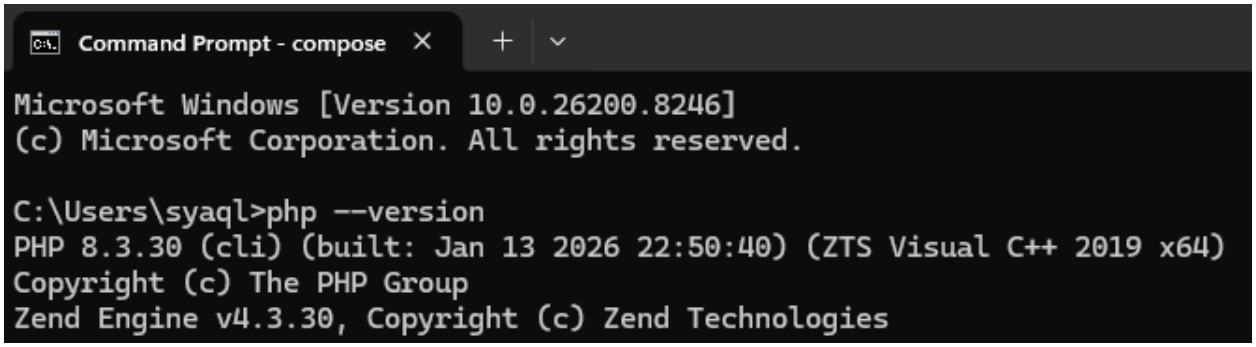
Kelas : A
Tugas Mata Kuliah : Pemrograman Website

AKTIVITAS MANDIRI 1

Menjalankan Laragon (Start All)



1. Cek PHP tersedia dengan php --version



2. Cek Composer tersedia dengan composer –version

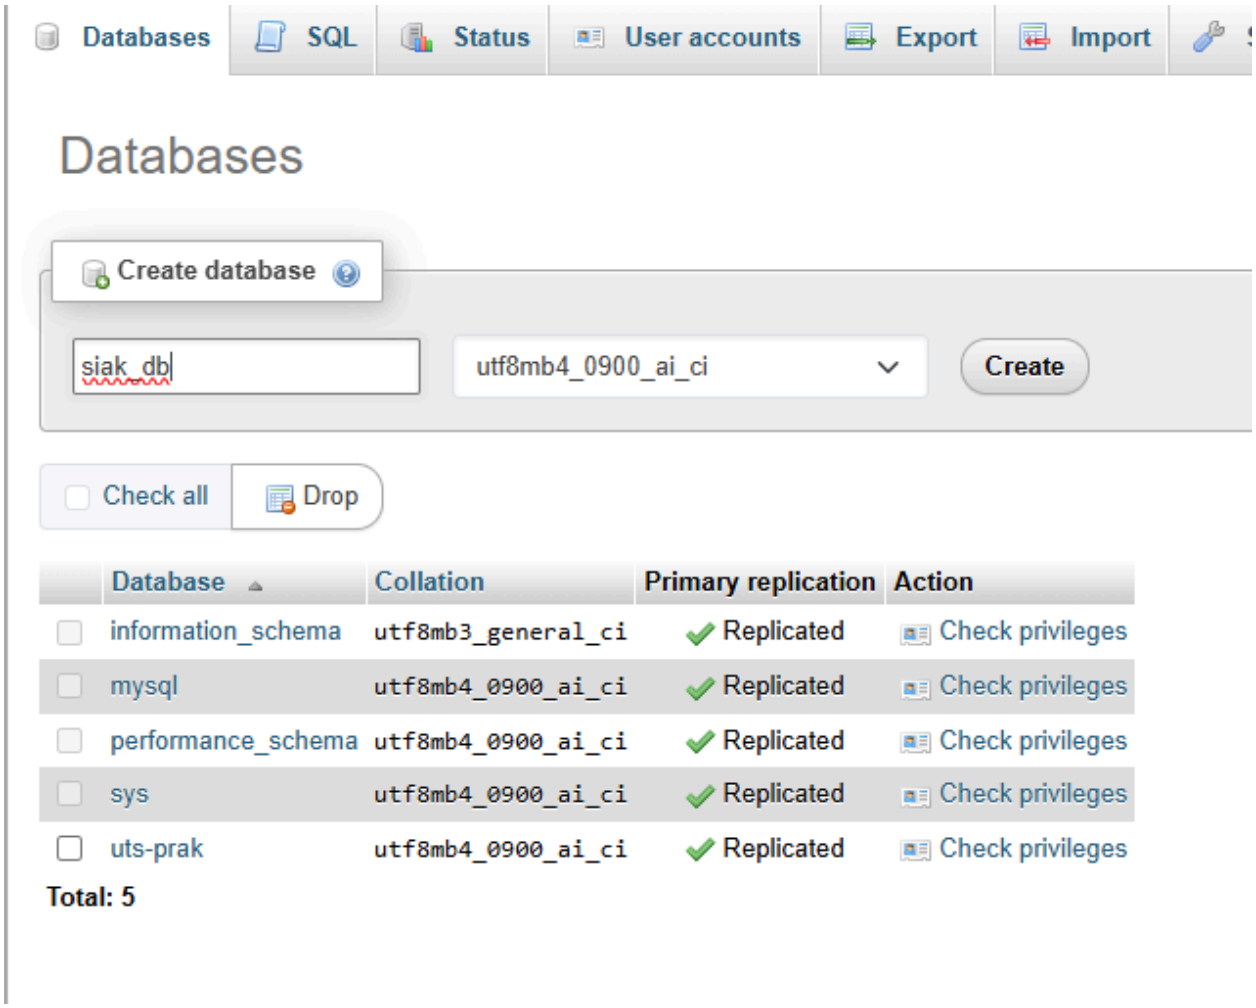
```
C:\Users\syaql>composer --version
Composer version 2.9.4 2026-01-22 14:08:50
PHP version 8.3.30 (C:\laragon\bin\php\php-8.3.30-Win32-vs16-x64\php.exe)
Run the "diagnose" command to get more detailed diagnostics output.
```

3. Membuat project laravel baru dengan composer create-project laravel/laravel siak-app

```
C:\Users\syaql>cd C:\laragon\www

C:\laragon\www>composer create-project laravel/laravel siak-app
Creating a "laravel/laravel" project at "./siak-app"
Installing laravel/laravel (v13.3.0)
  - Installing laravel/laravel (v13.3.0): Extracting archive
Created project in C:\laragon\www\siak-app
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 107 installs, 0 updates, 0 removals
  - Locking brick/math (0.14.8)
  - Locking carbonphp/carbon-doctrine-types (3.2.0)
  - Locking dflydev/dot-access-data (v3.0.3)
  - Locking doctrine/inflector (2.1.0)
  - Locking doctrine/lexer (3.0.1)
  - Locking dragonmantank/cron-expression (v3.6.0)
```

4. Membuat dataset baru siak_db di phpMyAdmin



5. Konfigurasi file .env

```
DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=siak_db
DB_USERNAME=root
DB_PASSWORD=
```

6. Menjalankan php artisan key:generate

```
C:\laragon\www\siak-app>php artisan key:generate

  INFO  Application key set successfully.
```

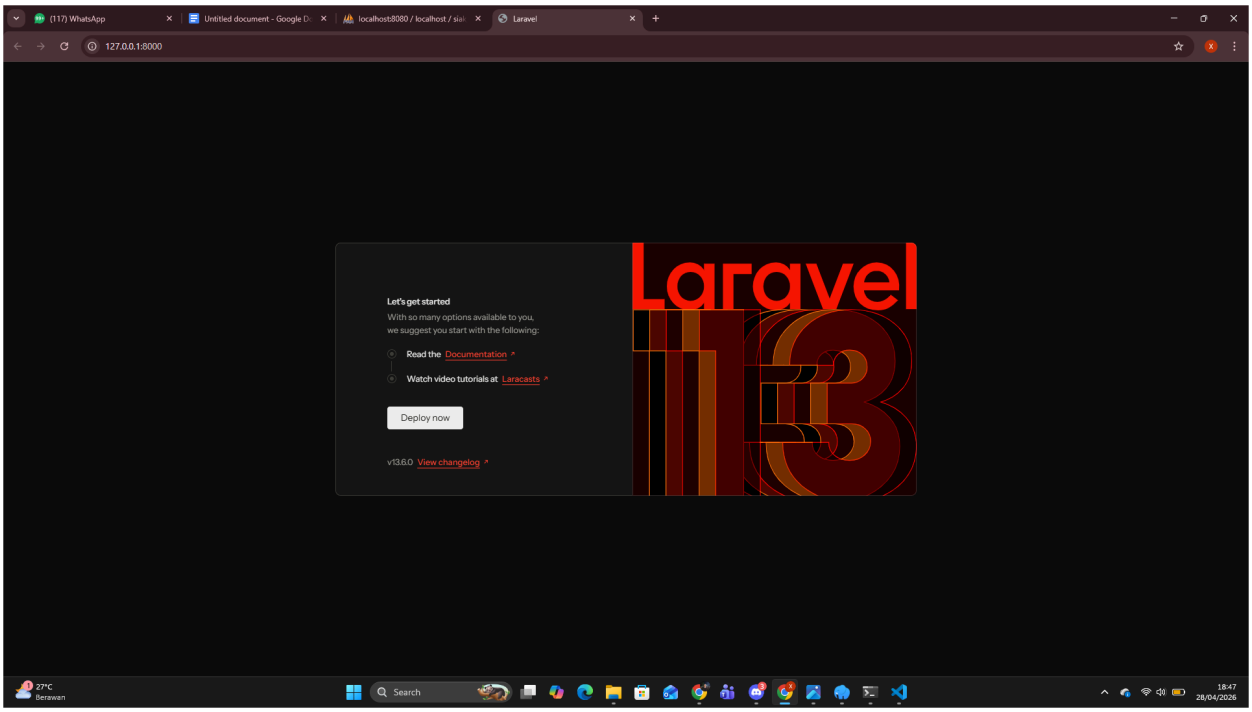
7. Menjalankan server php artisan serve dan membuka http://127.0.0.1:8000 di browser

```
C:\laragon\www\siak-app>php artisan serve

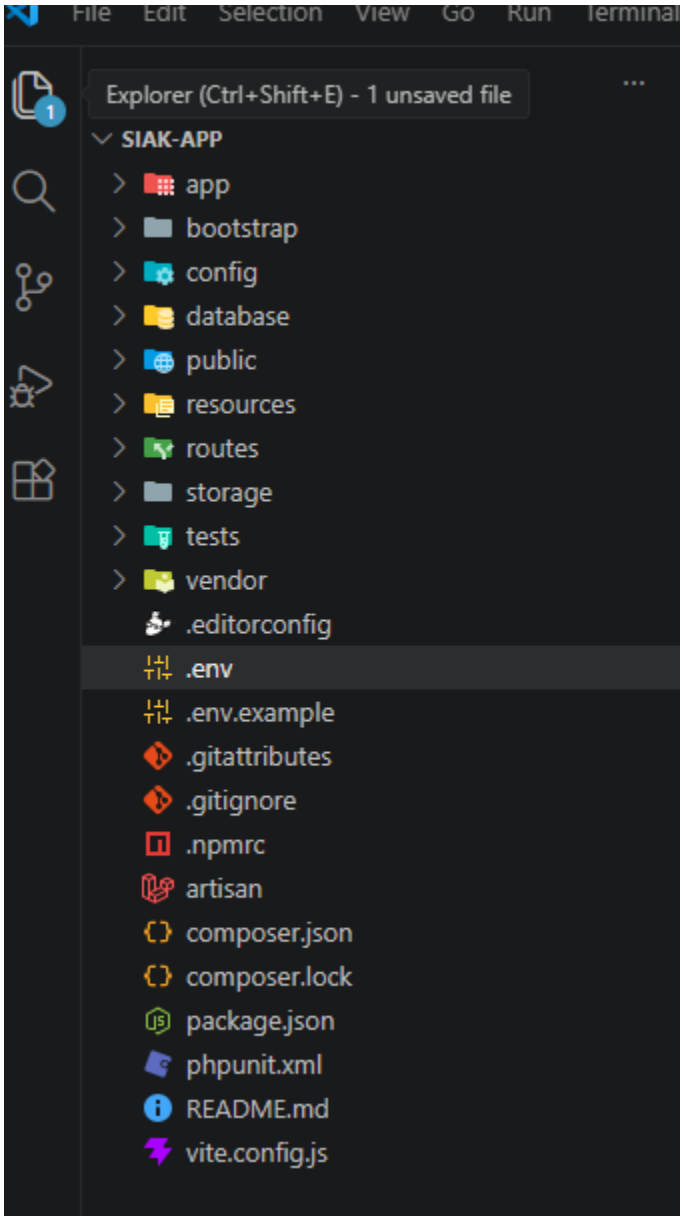
  INFO  Server running on [http://127.0.0.1:8000].

  Press Ctrl+C to stop the server

  2026-04-28 18:47:28 / ..................................................... ~ 1s
  2026-04-28 18:47:28 /favicon.ico .......................................... ~ 1s
```



8. Eksplorasi setiap struktur folder



9. Menjalankan php artisan route:list

```
C:\laragon\www\siak-app>php artisan route:list

  GET|HEAD  / ..................................................................... routes/web.php:5
  GET|HEAD  storage/{path} storage.local › vendor/laravel/framework/src/Illuminate/Filesystem/FilesystemServiceProvid…
  PUT       storage/{path} storage.local.upload › vendor/laravel/framework/src/Illuminate/Filesystem/FilesystemServic…
  GET|HEAD  up ........... vendor/laravel/framework/src/Illuminate/Foundation/Configuration/ApplicationBuilder.php:223

                                                                                    Showing [4] routes

C:\laragon\www\siak-app>
```

Route yang sudah terdaftar setelah menjalankan perintah php artisan route:list antara lain route bawaan laravel yaitu :

a. Route /
   Route ini menggunakan method GET/HEAD dan berfungsi untuk menampilkan halaman awal Laravel. Ketika pengguna mengakses alamat http://127.0.0.1:8000, Laravel akan menampilkan file welcome.blade.php.
b. Route storage/{path}
   Route ini digunakan untuk mengakses file yang terdapat di dalam folder storage, digunakan untuk upload file atau menampilkan file seperti gambar. Route ini menggunakan method GET/HEAD dan PUT.
c. Route /up
   Route ini berfungsi untuk mengecek apakah aplikasi Laravel berjalan dengan baik. Route ini biasanya digunakan oleh sistem atau server, bukan untuk diakses langsung oleh pengguna.

AKTIVITAS MANDIRI 2

1. Membuat Controller Dashboard Controller dengan php artisan make:controller DashboardController

```
C:\laragon\www\siak-app>php artisan make:controller DashboardController

  INFO  Controller [C:\laragon\www\siak-app\app\Http\Controllers\DashboardController.php] created successfully.
```

2. Menambahkan method index() yang mengembalikan view(‘dashboard’)

app > Http > Controllers > DashboardController.php > ...

```php
<?php

namespace App\Http\Controllers;

use Illuminate\Http\Request;

class DashboardController extends Controller
{
    public function index()
{
    return view('dashboard');
}
}
```

3. Mendaftarkan route di routes/web.php Route::get(‘/dashboard’, [DashboardController::class, ‘index’] -> name(‘dashboard’);

routes > web.php

```php
<?php

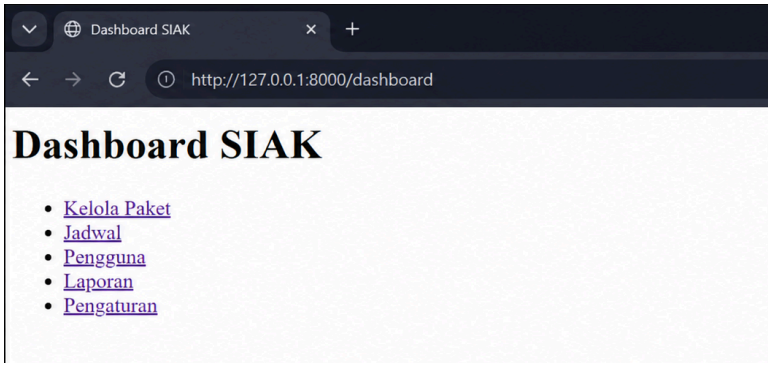
use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', function () {
    return view('welcome');
});
Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');
```

4. Membuat file view sementara resource/view/dashboard.blade.php yang berisi <h1>Dashboard SIAK</h1>

```
resources > views > dashboard.blade.php > ...
1   <h1>dasboard SIAK</h1>
2
3   <ul>
4       <li><a href="{{ route('kelola.paket') }}">Kelola Paket</a></li>
5       <li><a href="{{ route('jadwal') }}">Jadwal</a></li>
6       <li><a href="{{ route('pengguna') }}">Pengguna</a></li>
7       <li><a href="{{ route('laporan') }}">Laporan</a></li>
8       <li><a href="{{ route('pengaturan') }}">Pengaturan</a></li>
9   </ul>
```

5. Mengakses http://127.0.0.1:8000/dashboard di browser



6. Membuat route /tentang dengan Route::view('/tentang', 'tentang'); dan membuat view-nya

```php
<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

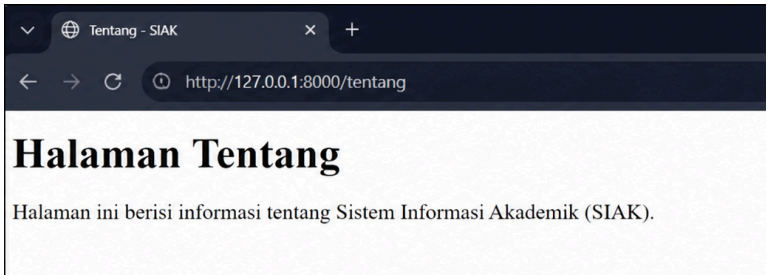
Route::get('/', function () {
    return view('welcome');
});

Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');

Route::view('/tentang', 'tentang');

Route::get('/hitung/{a}/{b}', function ($a, $b) {
    return $a + $b;
});
```

```blade.php
<h1>Halaman Tentang</h1>
```



7. Menjalankan php artisan route:list

```
PS C:\laragon\www\siak-app> php artisan route:list

  GET|HEAD  /                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                routes/web.php:6
  GET|HEAD  dashboard ..... dashboard › DashboardController@index

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Showing [7] routes
```

8. Membuat Route::get(‘/hitung/{a}/{b}’,fn($a+$b) dan akses hitung /hitung.10/25

.env | DashboardController.php | dashboard.blade.php | web.php | Controlle

routes > web.php

```php
<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', function () {
    return view('welcome');
});

Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');

Route::view('/tentang', 'tentang');

Route::get('/hitung/{a}/{b}', function ($a, $b) {
    return $a + $b;
});
```
